

Image 1: *Callionymus lyra*. Hyland, Vincent, (derrynane.ie, 2019)

Tricky little “sordid”.

**CALLIONYMUS
PHOTOGRAPHIC
QUIZ**, DEVELOPED FOR
SEASEARCH FOR ANALYSIS
OF CALLIONYMUS
RECORDS BASED ON THE
HYPOTHESIS THAT THE
CALLIONYMUS
RETICULATUS MAY BE
UNDER-RECORDED
ACROSS KNOWN
DISTRIBUTION.
LISA NIHILL - STUDENT
Dragonet project

Instructions

The quiz has been developed using photographs from reputable sources and are research grade where possible. Photographs were chosen for a total of 20 from a bank of 30 and randomly assigned to the quiz. There are dropdown menus underneath each photograph where you can choose whether you think it is a common dragonet (*Callionymus lyra*) or a Reticulated dragonet (*Callionymus reticulatus*).

Simply save your changes and e-mail it back to me please. Thank you for your time.

Callionymus

Callionymus lyra

There are 2 photographs on each page, take all the time you like and enjoy the process. Thank you for your efforts.

Thank you so much for your participation. I will be analysing the data together and no personal details will be shared, if you would like your personal results, I would be happy to send them to you, just leave me a note along with your submission. This may take a few weeks as the quiz is manual, I felt this was important for ease of participation and wanted to get as many participants as possible. Eternally grateful, Lisa Nihill. lisanihill@gmail.com
